EDUCATION

Mohamed Bin Zayed University of Artificial Intelligence (MBZUAI)

Aug. 2021 - May 2023

MASTERS OF SCIENCE IN COMPUTER VISION (FULL RIDE SCHOLARSHIP)

UAE

- **GPA:** 3.68/4.0
- **Major courses:** Human and Computer Vision, Visual Object Recognition and Detection, Geometry for Computer Vision, Digital Twins.
- **Thesis:** "A Coarse-to-Fine Pseudo-Labeling (C2FPL) Framework for Unsupervised Video Anomaly Detection"

King Saud University (KSU)

Sept. 2015 - May 2020

BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (FULL RIDE SCHOLARSHIP)

Saudi Arabia

- **GPA:** 4.79/5.0
- **Ranked 1st among students graduated in my major**
- **Thesis:** "Sky-Imager Based Forecast of Solar Irradiance Using Machine Learning"

PUBLICATIONS

- **Al-Lahham, A.**, Zaheer, M. Z., Tastan, N., & Nandakumar, K. (2024). Collaborative Learning of Anomalies with Privacy (CLAP) for Unsupervised Video Anomaly Detection: A New Baseline. In Proceedings of the IEEE/CVF Conference on Computer Vision and Pattern Recognition (pp. 12416-12425).

RESEARCH INTERESTS

Computer Vision, Video Anomaly Detection, Early Action Prediction, Renewable Energy

PROJECTS

(CVPR'24) Collaborative Learning of Anomalies with Privacy (CLAP) for Unsupervised Video Anomaly Detection: A New Baseline

Sept. 2023 - Feb 2024

- We propose a new baseline for anomaly detection capable of localizing anomalous events in complex surveillance scenarios in a fully unsupervised fashion without any labels on a privacy-retaining distributed participant-based training configuration. To the best of our knowledge, is the first rigorous attempt to tackle video anomaly detection in the federated learning setting.
- We propose three new evaluation protocols to extensively evaluate CLAP on various scenarios of collaborations and data availability. Moreover, to carry out these evaluations, we modify the existing VAD datasets to create new splits.

(WACV'24) A Coarse-to-Fine Pseudo-Labeling (C2FPL) Framework for Unsupervised Video Anomaly Detection

Aug. 2022 - Oct 2023

- We propose a novel anomaly detection framework that is independent of the video length
- We propose a new technique for creating and refining feature-level pseudo-labels using weak supervision
- We extend the pseudo-labeling method to completely eradicate the need of having training labels (**Published at WACV 2024**)

Sensory Data Fusion for High-Resolution PM_{2.5} Estimation and Action Policies Recommendation*

Feb. 2022 - Sep. 2022

- The project aims to build a digital twin (DT) of an atmospheric environment by fusing remote sensing and observational data
- Estimated values of PM_{2.5} obtained from an ensemble model are used to provide recommendations for decreasing the agglomeration levels.
- Published an academic journal paper regarding the proposed project (**Published: 12 January 2023**).

Sky-Imager Based Forecast of Solar Irradiance Using Machine Learning

Sept. 2019 - Oct. 2020

- This project presents a new computationally efficient machine learning algorithm for forecasting solar irradiance for durations from 1 hour up to 4 hours using sky images.
- Compared to state-of-the-art computationally heavy algorithms, our approach achieves competitive results with much less computational complexity for both nowcasting and forecasting up to 4 hours ahead of time.
- Published an academic journal paper regarding the proposed approach (**Published: 16 October 2020**).

EXPERIENCE

MBZUAI

RESEARCH ASSISTANT

Projects: 1) Automated Monitoring of Photovoltaic Plants using Aerial Videos 2) **C2FPL** 3) **CLAP**

Jul. 2023 - Present

UAE

MBZUAI

TEACHING ASSISTANT FOR MATHEMATICAL FOUNDATIONS OF ARTIFICIAL INTELLIGENCE

Aug. 2022 - Dec 2022

UAE

YOUSSEF MARROUN CONT.CO (YMCO)

ELECTRICAL PROJECT ENGINEER

Jun. 2019 - Aug. 2019

Saudi Arabia

- **Internship** at YMCO on DALLAH hospital west expansion project. Worked with the electrical engineering team on reviewing and verifying different electrical systems layouts using AutoCAD, such as power, lighting, structure cable.

TECHNICAL STRENGTHS

Software & Tools MATLAB, AutoCAD
Languages Python (Intermediate), C++ (Basic)
Frameworks PyTorch, OPENCV, Tensorflow

ACADEMIC ACHIEVEMENTS

***Top 3 Teams in NASA Airathon competition: Predict Air Quality** 2022

King Saud University Distinguished and Talented Students Program Student Member 2015
